

software keypads

AMX Software Keypads combine attractive design, two-way AXLink control and simplified installation. Three models are available—MSP8 with 8 buttons, 1 bargraph; MSP16 with 16 buttons, 2 bargraphs and MSP32, 32 buttons, 3 bargraphs. All are styled to match Decora™ wall plates and other AMX wall panels. Perfect for any surface-mount application, Software Keypads will fit within most US-style gang wall boxes.

The Software Keypads include enhancements for the user, designer, and installer. The LED indicators are located at the left of each button, allowing the user to see the status while pressing a button. Each panel contains the full set of switches and LEDs, so the panel can be customized — just change the keypads.

software keypads

AXD-MSP8 : SOFTWARE 8-BUTTON KEYPAD (FG790-08,-09)

- Provides up to 8 control buttons with LED feed back and one horizontal 8-segment LED bargraph display
